

## *Tertiary scholarships*

Each year we provide an opportunity for up to three West Coast students to receive assistance with university fees and guaranteed holiday work from November to February. Full employment is offered after graduation, subject to a position being available.

The students we are seeking to recruit will generally be studying biological sciences, food technology/biotechnology, chemical and process engineering, applied sciences (e.g. environmental science), nutrition, business management, commerce (particularly marketing and accounting) or information technology/computer science. All disciplines will however be considered.

Three scholarships are offered annually enabling students to undertake or complete either a Bachelors or Honours Degree. Other scholarships may be available suitable candidates to complete a Masters Degree or undertake research towards a Doctorate.

Masters Degree recipients' theses should be in areas relevant to Westland Milk Products, such as product development or process innovation. Similarly, the candidate's thesis for a Doctorate would need to have direct relevance to the Company.

The annual scholarship grant ranges from up to \$3,000 per year for Bachelors/Honours students to \$6,000 for Masters students and \$25,000 for PhD research.

***Applicants are sought in October or November each year, so for further enquiries or to register your interest, please email [careers@westland.co.nz](mailto:careers@westland.co.nz)***
